Ask The Dentist

usually easy to identify and correct.

You may have a cavity and the gum is reacting to the bacteria present, even if you do not feel a hole. You may also have a slight gap between the teeth allowing debris to accumulate.

If you already have a filling or a crown on these teeth, there may be leakage or they may go too far under the gum causing an irritation to the normal anatomy. This can also be corrected.

At **TODAY'S DENTAL CARE** the focus is on you, your health and your comfort. If you are having dental problems or questions, please call **345-8333** now to receive a **complimentary consultation**. You may also direct your questions to Dr. Dillow at drdillow@todaysdentalcare.net or view our article archive at www.todaysdentalcare.net

Q: I have a place between two teeth where my gum bleeds frequently no matter what I do. What can I do about this?

A: Bleeding is a sign of unhealthy gum tissue. If this is the only place where your gums bleed, the cause is
