

Dr. Ron Dillow

Ask The Dentist

If it is only one or two isolated areas, a cleaning may be appropriate.

A complete examination should be done along with evaluating your medical history in order to come up with a reason this is happening.

If left untreated you are creating a risk to your general medical health, just like any infection in your body. It has never been easier to get this problem corrected, comfortably and thoroughly.

At **TODAY'S DENTAL CARE** the focus is on you, your health and your comfort. If you are

having dental problems or questions, please call **345-8333** now to receive a **complimentary consultation**. You

may also direct your questions to Dr. Dillow at drdillow@todaysdentalcare.net or view our article archive at www.todaysdentalcare.net

Q: My gums bleed and are sore sometimes. If I get my teeth cleaned, will it go away?

A: Getting this looked at right away is a really good idea. Bleeding and soreness are symptoms of a disease process occurring in your mouth.
