

Dr. Ron Dillow

Q: I wear dentures that are getting older. I don't chew as well as I used to and my face looks more sunken in. I am worried about getting new dentures. What should I do?

A: Most successful denture wearers develop a bond with their dentures and are afraid

Ask The Dentist

of changing to a new set. It sounds like your mouth is changing in ways that cause your dentures not to work like they used to. Being fitted with new dentures is probably the answer for you now to prevent things from getting worse.

It is very important that you be actively involved in the fitting process and find a dentist who will partner with you. Ask questions and communicate your concerns and your expectations with the dentist through the fitting process.

Many advances have been made in the fitting of dentures that improve appearance and help the dentures work better.
