

**Dr. Ron Dillow**

**Q: I have a partial denture with metal wires that show when I smile. Is there anything I can do to make it look better?**

**A:** Metal wires can look like cavities in your smile. If you wanted to stay with a partial, I make partials

# Ask The Dentist

that are virtually invisible. There are no metal wires and no metal of any kind in these partials and they fit very comfortably in your mouth.

If you wanted to get rid of the partial, I can now replace missing teeth in a way that stay in just like natural teeth. These replacements have no wires or frameworks that catch food and impair speech.

Either way, you can get rid of the unsightly metal in your smile. Life is

too short to suffer with something you do not like.

Here at **TODAY'S DENTAL CARE** the focus is on you, your health and your comfort. If you are having dental problems or questions, please call **345-8333** now to reserve a **complimentary consultation** with Dr. Dillow.
