

Dr. Ron Dillow

Ask The Dentist

There is a solution to your problem. Snap in dentures will keep your lower denture in place while chewing, speaking and even sneezing. No more embarrassment and fear that your dentures may fly out. Go ahead and eat what you want.

I have placed a lot of mini implants over the past 10 years and they are the answer to your problem.

My patients tell me it has changed their life.

Here at Today's Dental Care the focus is on you, your health and your comfort. If you are having dental problems or questions, please call **345-8333 now** to receive a **complimentary consultation**. You may also direct your questions to Dr. Dillow or view our article archive at drdillowtodaydentalcare.net

Q: My lower denture just does not work. Even denture adhesive won't keep in place. What can I do?

A: I know exactly what you are going through. I meet many denture wearers who tell me the same thing.
